ET ERNA ACOUSTIC

Rigid Luxury Vinyl Tiles (LVT) are perfect for homes wanting a beautiful, natural looking floor that's easy to install, durable and simple to look after. Thanks to a dense and solid core, they can be installed over uneven subfloors and with the speed of a Uniclic® joint, they're a great choice for renovation. Take advantage of the integrated pad that also reduces noise, and installation is even simpler. With all the advantages that make vinyl floors so easy to enjoy, Rigid LVT is perfect for today's busy family homes.

Our Belgian design team has made sure that Eterna Acoustic features all the benefits of Rigid LVT in a floor that brings you closer to nature. Setting an atmosphere that's always sophisticated, Eterna Acoustic presents unique and original wood and tile designs that add elegance and a premium finish to home interiors.

Why choose Eterna Acoustic?

#02

BENEFITS OF ETERNA ACOUSTIC

Quick and straightforward to install, durable in use and wonderfully simple to maintain, Eterna Acoustic brings a premium floor for homes demanding the best in quality.

The assured benefits of vinyl

Eterna Acoustic has all the practical advantages you could want from a floor. Water-resistant and with exceptional scratch and stain protection, Eterna Acoustic is made to withstand daily use in the busiest of homes. And with a construction that's 100% recyclable, it's a reassuring choice for the planet too.

Renovation friendly

With a rigid and dense core that stops unevenness and the time-tested Uniclic® joint, Eterna Acoustic's advanced multi-layer construction is ideal for renovation. Thanks to its integrated pad that eliminates the need for a separate underlay, Eterna Acoustic is even easier to install.

Close to nature designs

Designed completely in-house in Belgium, Eterna Acoustic's broad range of wood, stone and concrete looks are recreated in exquisite detail. With a textured surface, extra-matt top layer, and a large variety of planks or tiles in every design for authenticity, homes step closer to nature.

Best in strength and quality

Tested to the world's most stringent standards and endorsed by IVC Group, you can trust the quality and premium construction of Eterna Acoustic. With a strong core, hardwearing 0,55 mm wear finish and superior scratch and stain protection, Eterna Acoustic is made to endure.

#03

How is this premium rigid flooring made?

PRODUCT BUILD-UP OF ETERNA ACOUSTIC

Eterna Acoustic uses the latest innovation in compact flooring construction to provide a beautiful and strong floor that delivers on every front. At the heart of Eterna Acoustic is the rigid core that ensures excellent stability and easy installation. Combined with a high-quality protective lacquer and an integrated pad, it's a construction that provides exceptional performance.

Let's look at Eterna Acoustic's multi-layer construction in a little more detail:

GLOSSARY

Design

Strength

Acoustic

Scratch & stain

Moisture protection

Dimensional stability

1 Protective Superguard®

The protection of a PU lacquer that doesn't wash-off means that Eterna Acoustic delivers exceptional scratch and stain-resistancy. Standing up to everything that drops, spills or walks on it, this extra matt layer enhances the usability of Eterna Acoustic and contributes to a premium and long-lasting finish.

2 Durable wear layer

The 0,55 mm wear layer found on all Eterna Acoustic floors provides resistance to wear for an enduring surface that's best for the busiest of family homes. In fact, Eterna Acoustic is tough enough for intense daily use and to meet the standards of class 23 and 33. A textured finish helps Eterna Acoustic to feel as good as it looks.

3 High-definition design layer

Thanks to this high-definition design layer that's created by our designers in Belgium, Eterna Acoustic exquisitely captures the beauty of wood, stone or concrete in every one of its looks. The exclusive and original layer features one of the largest patterns available for more variety and a floor that is close to nature.

4 Rigid core

The dense, rigid core of Eterna Acoustic brings many advantages. Preventing telegraphing, Eterna Acoustic can be installed over a range of less than perfect subfloors. The core is also the reason for the class-leading dimensional stability. Keeping movement to the bare minimum, it makes sure Eterna Acoustic stays locked to the ground, regardless of temperature. The core also lets you enjoy the speed and simplicity of Uniclic® installation, with its renowned locking strength and reliability.

5 Premium integrated pad

This integrated, fully recyclable pad helps with installation and eliminates the cost and time of a separate underlay. Made from materials specifically selected for the perfect balance of strength and acoustics, the pad also ensures that distracting noise is reduced for a more comfortable atmosphere, not only for you but also for your downstairs neighbours.

Installation

W O R R Y - F R E E R I G I D C L I C K S Y S T E M

Eterna Acoustic's rigid core and reliable Uniclic® locking system assures a smooth installation for a lasting result. Featuring an integrated pad, it eliminates the need for a separate underlay.

Looks

C L O S E R T O N A T U R E

Designed in Belgium, Eterna Acoustic contains a wide range of oaklook planks and modern stonelook tiles. The collection varies from very modern, subtle and calm visuals to a more rustic look with knots and cracks. Ranging from cooler shades of grey to warm blond and deep brown in colour, these oak patterns enhance a truly natural look for your interior. A wider plank and sharp emboss make it even more contemporary. The stone look patterns come in 3 different colours concretelook, a metallic pattern for a rich and uplifting look and an expressive terrazzolook. Finished with a modest bevel and an extra matt coating, the Eterna Acoustic collection fits seamlessly into all interior trends.

#07 Floors better for today

I N E V E R Y W A Y

IVC Group is a global player in the design and manufacture of flooring solutions including Luxury Vinyl Tiles (LVT), Sheet Vinyl & Carpet Tiles for use in public and private environments. Accountable for our actions, we design and make floors responsibly in Belgium, developing a circular approach to the future of flooring.

IVC Group is part of Mohawk Industries Inc., the world's largest flooring company. With 1,500 employees and 7 production sites in Europe and Russia, IVC Group produces over 130,000,000 m² of flooring every year.

Did you know...

that IVC Group employs over 30 different nationalities worldwide?
That's the many cultures and inspirations which go into our eclectic floor designs, explaining their global appeal.

At IVC Group, we believe that innovation is the best way to create better floors for today's homes. Our Rigid LVT technology ensures that you benefit from a floor that's not only beautiful to look at, but also simple to install, long-lasting and easy to maintain.

We've submitted Eterna Acoustic to a series of stringent external tests for the international standard EN 16511. By exposing Eterna Acoustic to tests on quality, wear and strength; this new standard is a sign that we're committed to delivering you premium quality floors that are better for today, in every way.
